

## 1.3 Learning to Read Mathematics

---

### What Do You Already Know? *Tapping into your existing knowledge*

1. What role does vocabulary play when you're reading a mathematics textbook?
2. What role do determining your purpose and learning objectives play when you're reading mathematics?
3. What is it that you want to accomplish when you get a quick overview of the pages you're reading?
4. What role do asking and answering questions play in the reading process?
5. What role do examples and discussion of examples play to produce understanding in reading?
