

Learning to Learn Mathematics *Reflecting on and appreciating your learning*

1. When you see notation that is new, what is the interplay between your thinking and your feeling?
2. When producing meaning in language, how do you ensure that your interpretation of a mathematical term or symbol agrees with the definitions and interpretations used by mathematicians?
3. What are the triggers within your reading process that help you formulate strong inquiry questions (which in turn helps you to advance your comprehension)?
