

Teaching **REIMAGINED** for the Age of **AI**

Friday — Sunday
May 30 — June 1

University of Indianapolis, RB Annis Hall

*An Open Invitation to Faculty
Seeking Purpose, Progress,
& Professional Transformation*

We stand at a pivotal moment in the evolution of education and while the traditional boundaries of teaching are being redrawn, it can be through **augmentation** instead of **automation**. This May, Pacific Crest invites educators to be part of a groundbreaking **Teaching Institute** that combines the proven principles of Process Education with the cutting-edge power of AI-driven facilitation to accelerate and deepen the process. This is more than just a professional development event; it's a bold leap into the future of teaching and learning. The experience is designed to help you redefine your role as an educator, mentor, and designer of transformative learning environments and develop the skills, mindset, and strategies you need.

You'll do more than just learn to **use** AI...you'll focus on learning **with** AI and experience how AI **transforms** teaching and learning through...

Immersive sessions that model a Process Education classroom from the student's perspective	Hands-on AI integration using customized GPTs to co-facilitate teaching, assessment, and course design	Reflective activities that examine the changing identity of educators in AI-augmented classrooms	Team-based problem solving and facilitation with AI as your co-designer	Dynamic assessment and self-assessment tools powered by AI
--	--	--	---	--

Whether you are a new instructor or a seasoned faculty member, this Institute offers a space to **reignite** your passion, **expand** your capabilities, and **lead the future** of education. Join us and shape the future of learning.

Seats are limited.

We're looking for faculty who are curious, open, and ready to transform both their teaching **and** themselves.

Let's explore just how far we can take learning when the teacher, the learner, and the AI all grow together.
